

MedMasters Course Architecture System™

Master Project Brief for Claude

Purpose

The MedMasters Course Architecture System™ (MCAS) is a faculty-focused instructional design framework that guides educators through the process of designing, building, evaluating, and launching high-quality courses.

The system is intended for higher education faculty, instructional designers, department chairs, and academic administrators.

MCAS is not primarily a content-generation system.

MCAS is a course architecture system that combines:

- Backward Design
- Universal Design for Learning (UDL)
- Accessibility Standards (WCAG)
- Regular and Substantive Interaction (RSI)
- Academic Integrity by Design
- Evidence-Based Teaching Practices
- AI-Assisted Content Development

The goal is to help faculty build courses that are:

- Aligned
- Engaging
- Accessible
- Compliant
- Scalable
- Efficient to maintain

Core Philosophy

Most AI tools generate content.

MedMasters architects learning experiences.

The system should prioritize:

1. Learning outcomes before content

2. Student experience before technology
 3. Course architecture before AI generation
 4. Compliance before deployment
 5. Reusability and scalability
-

System Workflow

Phase 1: Discover

Purpose: Define the course.

Outputs:

- Course Vision
- Student Population
- Learning Outcomes
- Delivery Format
- Course Scope
- Weekly Rhythm

Deliverable:

Course Design Brief

Phase 2: Design

Purpose: Create the instructional identity.

Outputs:

- Faculty Brand Sheet
- Teaching Philosophy
- Tone and Voice Guide
- Visual Style Guide
- Accessibility Preferences
- AI Instruction Preferences

Deliverable:

Master Faculty Brand Sheet

Phase 3: Asset Capture

Purpose: Collect and organize existing materials.

Examples:

- PowerPoints
- PDFs
- Lecture Notes
- YouTube Videos
- Images
- Lab Materials
- Question Banks
- Publisher Resources
- Existing Canvas Content

Deliverable:

Asset Inventory

Phase 4: Schedule & Pacing

Purpose: Organize learning across the term.

Outputs:

- Semester Map
- Weekly Calendar
- Assessment Timeline
- Student Workload Analysis
- Faculty Workload Analysis
- RSI Calendar

Deliverable:

Master Course Schedule

Phase 5: Frame

Purpose: Build the course structure.

Outputs:

- Module Blueprint

- Weekly Template
- Navigation Structure
- Assessment Map
- Alignment Map

Deliverable:

Master Course Blueprint

Phase 6: Build

Purpose: Generate course materials.

Potential Outputs:

- Welcome Pages
- Study Guides
- Lectures
- Notes
- Worksheets
- Learning Activities
- Discussions
- Labs

Deliverable:

Course Content Package

Phase 7: Assess

Purpose: Measure learning.

Potential Outputs:

- Quizzes
- Exams
- Rubrics
- Projects
- Clinical Assessments
- Practical Exams

Deliverable:

Assessment Package

Phase 8: Engage

Purpose: Create active learning.

Potential Outputs:

- Team-Based Learning Activities
- Clinical Cases
- Simulations
- Draw-to-Know-It Activities
- Map & Master Activities
- Reflection Activities

Deliverable:

Engagement Toolkit

Phase 9: Compliance

Track A: Accessibility

Standards:

WCAG 2.2 Level AA

Review Areas:

- Heading Structure
- Alt Text
- Color Contrast
- Accessible Tables
- Captioning
- Transcripts
- Accessible Documents
- Keyboard Navigation

Deliverable:

Accessibility Compliance Report

Track B: RSI

Standards:

Regular and Substantive Interaction requirements for distance education.

Evidence Areas:

- Instructor Presence
- Direct Instruction
- Guided Discussions
- Feedback Schedule
- Office Hours
- Communication Plan
- Student Support

Deliverable:

RSI Compliance Report

Track C: Academic Integrity

Review Areas:

- AI Policies
- Assessment Design
- Authentic Assessment
- Integrity Statements
- Academic Honesty Language

Deliverable:

Academic Integrity Review

Track D: Quality Assurance

Review Areas:

- Alignment
- Consistency
- Navigation
- Student Experience
- Learning Outcome Coverage

Deliverable:

Quality Assurance Report

Phase 10: Launch

Purpose: Prepare for deployment.

Outputs:

- Final Review
- Accessibility Review
- RSI Verification
- Course Readiness Audit
- Launch Checklist

Deliverable:

Course Launch Package

Phase 11: Scale

Purpose: Expand and improve.

Outputs:

- Additional Modules
- Companion Courses
- Hybrid Versions
- Online Versions
- Program Alignment
- Faculty Collaboration Resources

Deliverable:

Course Growth Plan

Master Workbook Structure

The system should use a single Excel workbook as the primary intake document.

Workbook Tabs:

1. Course Information
2. Faculty Brand Sheet
3. Learning Outcomes
4. Existing Assets

5. Schedule & Pacing
6. Module Builder
7. Assessments
8. Engagement Activities
9. Accessibility Review
10. RSI Review
11. Quality Assurance
12. Launch Checklist

The workbook serves as the single source of truth for all AI-generated outputs.

Final Certification Package

At project completion, generate:

- Course Blueprint Report
 - Assessment Architecture Report
 - Accessibility Compliance Report
 - RSI Compliance Report
 - Academic Integrity Report
 - Quality Assurance Report
 - Launch Checklist
 - Course Readiness Certification
-

Brand Guidance

Use MedMasters branding:

- Navy
- Rust
- Gold

Tone:

- Professional
- Collaborative
- Faculty-Centered
- Evidence-Based
- Practical
- Non-Corporate

Key Message:

Great courses aren't generated. They're architected.
